PROJECTS

Ethiopian Tourist Guide

Visiting Ethiopia? This virtual guide is extremely handy, you can scan the entire area in Ethiopia and find invaluable information of major attractions, places of interest, events, museums, plays, and probable locations of rare species of wild animals which you may be lucky enough to get a glimpse of! With this app, you can easily navigate your visit to Ethiopia!

- **Technologies Used:** Frontend: React & Redux, Backend: Django API.

Hunger Captian

Hunger Captian is an online food menu service. When you visit the restaurant, you often use the QR code to load the PDF of the menu. It has no image and is not easy to select. So we created the menu app where you can see food images with the needed information and select your items easily. During such an unprecedented time and social distancing, online menu card technology is a boon!

- **Technologies Used :** Frontend: React & Redux, Backend: Django API.
